# 1. ENERGY SAVING & COMFORT CARE

**Brand Compressor** - Daenyx air conditioning chooses **GMCC, Highly** and other world brand Compressors.

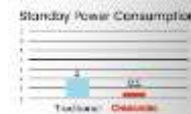

**Sleep Mode** - In sleep mode the indoor unit reduces the wind speed and turns off the display light to avoid light and noise from interfering with the users sleep. that create the desirable climate for a good nights sleep

**Quite Mode** - In quite mode the air conditioner will run at super breeze to reduce the indoor unit operating sound.

**4 in 1  
Convertible  
Modes**

- **4 in 1 Convertible** -With this feature , AC can be used for 4 different tonnages as per user requirement. Resulting higher efficiency & Comfort.

**0.5w Standby** - The digital green power design industry top stand by chip and intermittent oscillation made are use to reduce the AC stand by power consumption to 0.5 Watt.

**Turbo** - With this function the air conditioner will maximize the output of cooling and heating capacity making the room cool down or heat-up more rapidly , and attain the desire temperature in the shortest time.

# 1. ENERGY SAVING & COMFORT CARE

**R-32 Refrigerant** – Daenyx air-conditioner using R-32 refrigerant. R-32 is environmental friendly and offers superior performance.

**inverter Technology** - In inverter type, Air Conditioner, the temperature difference is adjusted by changing the motor speed without turning the motor ON & OFF.

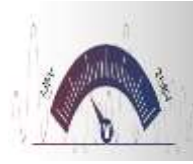

**Quiet Operation** - Quiet operation technology which ensures a whisper quiet functioning for the perfect comfort. As you must know ,regular Air conditioner start making noise after a year of functioning but with Daenyx technology, peaceful slumber is a guaranteed.

**Power Chill** - You don't have wait for the room to cool down, Power chill operation will quickly maximize the cooling effects in Cool mode. No matter how much is the temp. of your room , with this operation you will start feeling cool within minutes.

## 2. DC INVERTER

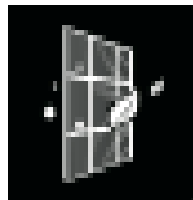

**Wide Voltage range** - Daenyx Inverter air conditioner with 145 Volt/268 Volt wide voltage range which is suitable for the reasons with unstable power supply.

**3 in 1 Filter** - Air travels through multiple filter and each has the function to provide you with better and healthier air.

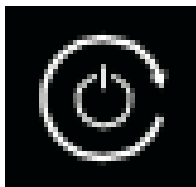

**Anti Virus Filter** - The anti virus filter has a bacteriostatic rate over 99% against bacteria and viruses.

**High Density Filter** - Daenyx High density filter creates cleaner air with outstanding dust collection due to new improved density of the filter

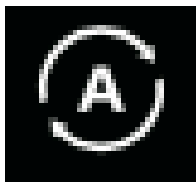

### 3. CONVENIENCE

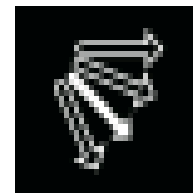

**Auto Restart** - When the power is off, the AC unit will restore the previous function setting and will restart automatically when the power is ON.

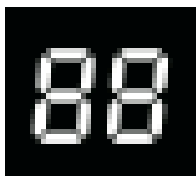

**24 Hr Trimmer** - The remote control adds a timing button can be set arbitrary in units of 1 hour within 1-24 hours.

**Auto mode** - In this mode, the AC automatically adjusts the operating mode and set temperature according to the ambient temperature.

**Louver Positioning Memory** - After turning on or changing the mode, the last operating state of the louver position will be automatically memorized, and the louver position will be automatically return to the previous state.

**Hidden LED Display** - Daenyx modern large hidden displays perfect for checking your display conveniently moreover with Hidden Display feature, avoid light simulation and take care of your sleep.

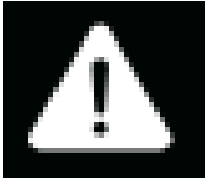

## 4. RELIABILITY

**Self Diagnosis and Auto Protection** - Monitoring some abnormal operations or parts failures microcomputer of air conditioner will switch off and protect the system automatically meanwhile, the error or protection code will be display on the Indoor unit.

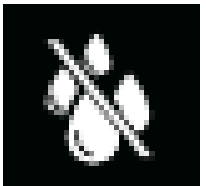

**Anti Rust Design** - Daenyx outdoor units adopts double- sided galvanized thickened steel plate, and the surface is evenly sprayed with polymer anti-corrosion powder to ensure that the outdoor unit will not rust for a long time.

**Error Alarm** - When air conditioner is running in any problem, the error or protection code, will be display on the Indoor unit.

**Fire Proof Electrical Control Box** - The fire-proof material is used for electric control box to improve its safety and fire-proof ability.

**Dew prevention** - In the cooling and humidification mode is affected by the accumulation of hot air near the air conditioner and the detected temperature will be higher than the actual ambient temperature. The background program is compensated to make the detected temperature as consistent as possible with the ambient temperature.

Thanks You
